### GOAL

---

I want to start my IT-career in a successful company, where I can get the real-world experience and develop skills in the field of software development, where I would be able to feel the importance of my work and work on interesting projects.

### SKILLS

---

- Strong knowledge of HTML, CSS(including HTML5, CSS3)
- Experience with Git
- Experience creating and deploying websites to WordPress from scratch
- Working and knowledge of JavaScript, and related libraries(JQuery, Gsap)
- Working and knowledge with task runners (Gulp)
- Working with preprocessors (Sass)
- Working with responsive web design approach and mobile solutions
- Working with Adobe Photoshop, Figma, Adobe Illustrator
- Ability to create simple MySQL-queries
- Understanding APIs services
- Checking the markup validity
- Excellent communication skills, ability to learn new software and processes quickly

and efficiently

- Good knowledge of React JS
- Experience with Redux, Context API
- Working experience with Node JS(handling requests, routing)
- Working experience with Mongo DB

## EDUCATION

---

Kiev College of Communication

Software development

Years: 2016 – 2020

## EXPERIENCE

---

- <https://devskup.netlify.com> – portfolio website created with React.
- Created Node JS server, which handles requests from the client and makes requests to Mongo DB: create user, login, publish a post.
- Developed 10+ websites, using HTML5, CSS3(flexbox, grid), JQuery, AJAX.
- Working with JQuery plugins(Owl Carousel 2, mmenu, Magnific Popup, YTPlayer etc.)
- Using PHP (for feedback form, WordPress).
- Also using Google Map API, Giphy API.

## ADDITIONAL INFORMATION

---

**English level:** Upper-Intermediate

**Interests:** Love learning something new, accepting challenges, approach the tasks with creativity. Now I'm developing my JS(including Node.js) skills, in the near future I want to become a full-stack developer.
